

No Potential to Discharge Determination Requests on Public Notice

The Michigan Department of Environmental Quality has received 14 no potential to discharge determination requests from CAFOs. Nine of those are on public notice from November 6, 2007 through December 6, 2007.

Information on each of the nine facilities, including a fact sheet and their application form, may be found on our online NPDES permit public notice system located here:

<http://www.deq.state.mi.us/owis/Page/main/Home.aspx> Click on "Permits on Public Notice" then in the "Permitting Program drop down box choose "NPDES". Do not make choices in any other drop down boxes on that page. Scroll down and click "Search". You will get several pages of items on public notice. They are in alphabetical order by name.

Note that these are not permits. If these requests are granted these facilities will not need to apply for NPDES permits that would otherwise be required. See the fact sheets for more information.

The nine facilities are listed below to help you locate them. Permit numbers all begin with MINPTD.

<u>Name</u>	<u>County</u>
Crockery Creek-80 th -CAFO	Newaygo
DeWeerd Poultry-CAFO	Allegan
